HUTH'S FINE PLANTS FOR YOUR GARDEN

ORNAMENTAL PLANTS

Abelia. Shade or sun. Glossy evergreen foliage. Pinkish white tubular flowers produced all summer.

Arborvitae, Baker's. Tall columnar habit; bright green.

Cape Jasmine, Everblooming (*Gardenia Fortunei*). Vigorous grower; darkest glossy leaves; large, perfectly formed, fragrant waxy white flowers. All summer.

Cedrus Deodara. Stately evergreen; pyramidal habit. Spreading branches. Foliage light silvery green.

Cherry Laurel. Superb large evergreen shrub for specimen or heavy hedge.

Cypress, Arizona. A tall-growing silvery blue pyramidal tree. Branching, dense foliage, making a perfectly shaped specimen.

Cypress, Italian. Tall, slender, green spires invaluable as accent points in the landscape planting.

Elm, Chinese. Fastest-growing shade tree; lovely form.

Flowering Quince. Deciduous shrub. Rosy red flowers on leafless branches in January. Handsome foliage throughout summer.

Goldflower (*Hypericum*). Beautiful, dwarf plant (12 inches). Clear, waxy flowers borne all summer. Superb for low mass effects.

Guava, Pineapple. Silver-gray foliage. Purple flowers and delicious fruits.

Jasmine (*Jasminum*). Graceful, spreading evergreen shrub 2 to 3 feet tall. Bright, rich yellow flowers.

Jasmine, Italian. Small yellow flowers all summer.

Juniper, Pfitzer's. Low, flat, spreading form, with fan-like branches. Foliage green with blue-gray tinge.

Ligustrum japonicum. Large, dark green leaves; valuable for medium or tall hedges or sheared trees.

Loquat (Japanese Plum). Evergreen tree; long, glossy leaves. Blooms in fall; yellow fruit in spring.

Magnolia grandiflora. Leaves large, thick, glossy green. Large, fragrant, milky white flowers in summer.

Nandina. Upright-growing shrub; bamboo-like shoots spring from roots. Leaves finely cut, brilliant colored, vary from dark green to red and coppery tones.

Pampas Grass. Forms a large clump of grass-like leaves surmounted by great silvery white plumes.

Photinia. Upright, compact growth; large leaves with reddish tint when young; fawn-colored stems.

Pittosporum Tobira. A wide-spreading, dense, round-headed shrub with deep glossy green foliage.

Privet, Amur River. Compact shrub for hedges or specimens of various shapes.

Pyracantha Lalandi. Upright. Orange berries.

Pyracantha yunnanensis. Spreading habit; scarlet berries.

Senisa or Ceniza. Evergreen. Silver leaf; lilac flowers.

Spiraea Vanhouttei (Bridal-Wreath). Masses of small white flowers.

ANEMONES

These many-colored hybrids provide the gayest kind of garden pictures. They are great cut-flowers but are so exciting in appearance that one hates to spoil the picture presented by a bed of these Anemones. Treat them about like Ranunculus and they will please you.

BLUE POPPY. A separate color of the De Caen variety.

DE CAEN. The plants are taller in growth than the St. Brigid and more single. They contain many fine shades of blue, white and scarlet.

HIS EXCELLENCY. Poppy-type flowers of vivid scarlet.

ST. BRIGID. Marvelous poppy-like double and semi-double flowers in a wide range of rich and brilliant colors.

ANEMONE, ST. BRIGID

AZALEAS

Coccinea Major. Brilliant red.

Formosa. Lavender-lilac.

Indica Alba. Pure white.

Kaempferi. Single; red.

Pride of Mobile. Pink.

NARCISSUS

Make your spring garden a place of beauty with plantings of lovely Narcissus. From the little fragrant Jonquils up to the great Trumpets of King Alfred, they are all beautiful, and Narcissus plantings last a long, long time.

Croesus. Truly a magnificent variety. Pale primrose perianth, with thick overlapping petals. Widely expanded crown, heavily suffused and stained deep orange-red.

King Alfred. Both perianth and trumpet are rich golden yellow. Trumpet deeply frilled.

Laurens Koster. Perianth pure white, with soft yellow eye. Robust grower and probably the best of the older varieties for general garden planting.

Mrs. E. H. Krelage. (White King Alfred). Similar but creamy white.

Sir Watkin. Sulphur-yellow perianth and large, well-formed, deep yellow trumpet. A particularly large-flowered and showy variety.

Twink, Double. Large, semi-full double flowers with alternating petals of soft primrose and clear orange, on tall stems.

JONQUILS, Single. Each stem carries from two to five large, rich deep yellow flowers which are delightfully fragrant.

NARCISSUS, continued

JONQUILS, Double Campenelle. A very charming variety bearing two or more double, deep yellow flowers of great substance on tall, graceful stems. Last long in the garden or when cut.

PAPER-WHITE NARCISSUS. We handle the Grandiflora variety, which is best for growing in water and sand. If planted successively about two weeks apart, you can have bloom continuously from Christmas to Easter.

YELLOW PAPER-WHITE NARCISSUS. For winter forcing indoors, Yellow Paper-White Narcissus are unrivaled. Placed in bowl with water and bulb fibre, the bulbs start their growth at once. The leaves soon appear, followed by large clusters of golden yellow flowers.

CHINESE SACRED LILY. Valued for its abundance of bloom and marvelously rapid growth. Flowers white with yellow cup in center; very fragrant.

YELLOW CALLA LILY. Rich, lustrous, golden yellow flowers. Distinctive, dark green foliage with creamy white spots.

PINK CALLA LILY (*Zantedeschia Rehmanni superba*). Flowers rose-pink changing to cerise. Large bulbs, \$1.50 each.

BLACK CALLA (*Arum pictum*). Hardy enough for outside planting. 75 cts. each.

DUTCH IRIS

Here is a great flower for cutting. The stems are long, the flowers last a long time when cut, and the soft colors are beautiful both indoors and out.

Dutch Iris get better every year, making them a paying investment. Plant them in solid beds or spot them through the border.

David Haring. Standards grayish white, falls pure white; very large flower of great substance.

Golden Glory. The dark Yellow Queen. Standards golden yellow, falls darker.

Imperator. Large, free-flowering; dark blue blooms.

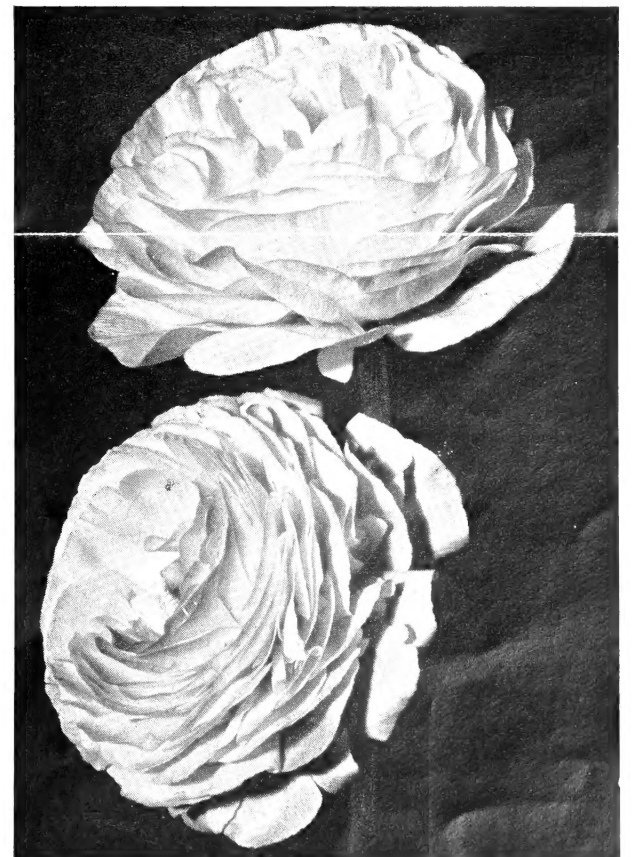

Wedgwood. Standards blue, falls lighter blue; excellent forcer.

Yellow Queen. Standards and falls golden yellow.

Thin, wiry stems. Excellent for forcing or outside.

Mixed Colors. A blend of many choice colors.

For information on bulbs not listed, please write us

RANUNCULUS

RANUNCULUS

For something different in your garden, try a solid bed of these lovely double Asiatic Buttercups. They are lasting flowers and very desirable for cutting.

MIXED GIANTS. The largest and most magnificent strain ever offered. Giant double and semi-double flowers, 3 inches and more across, are freely borne on strong stems, 12 to 15 inches long. Our mixture contains a wonderful range of colors—yellows, from straw through all shades to deep golden yellow; reds, including dark crimson, scarlet orange-red and all other shades of red; orange-pink, many ringed and tipped with a deeper color—in fact, every desired color is included. Set them, claws downward, 2 inches deep and 4 to 6 inches apart. If grown in pots, plant 6 to 8 roots in a 6-inch pot; cover roots with 1 inch of soil, and allow 2 inches of space between bulbs.

SEPARATE COLORS. Pink, white, red, yellow and gold.

PERENNIAL PHLOX FOR ALL GARDENS

Phlox are the most satisfactory of all summer and fall perennials. They furnish splendid color in quantities just when so many plants are resting, besides being fragrant and nice to cut. Brighten your garden with some of our modern varieties. They are inexpensive, easy to grow and pay big dividends in fragrant beauty.

Africa. Large heads of carmine-red with blood-red eye.

B. Compte. Large panicles of burgundy-red. Tall. Late.

Bridesmaid. An attractive variety. White florets with crimson eye.

Frau Anton Buchner. Large heads of pure white.

George Stipp. Deep glowing salmon with lighter eye.

La Vague. Mauve with carmine eye.

Leo Schlageter. Brilliant scarlet-red with darker centers.

Morgenrood. Bright rose with deeper eye.

San Antonio. Vivid carmine, shaded plum-red.

All Phlox, 25 cts. each, \$2.50 per doz., f.o.b. Nursery

GLAZED AND PLAIN CLAY POTTERY

of all kinds, sizes, and descriptions

GERBERA

(*Transvaal Daisy*)

Gerberas are half-hardy perennials and are easy to grow. They will stand light frosts, but must be protected against heavy ones.

Gerberas do well in any well-drained soil, but must be in the sun. Set the plants 12 to 18 inches apart and be sure the crowns of the plants are about one-half inch above the ground.

When watering give them a thorough soaking and then allow the soil to become moderately dry before watering again. The plants appreciate occasional shallow cultivation. Never use manure unless it is well rotted and although average blooms can be had without any fertilization, a good commercial fertilizer will help to produce extra-large flowers. Do not allow fertilizer to touch the crowns or foliage.

Gerberas are ideal cut-flowers having long stems and a color range through lovely art shades of pink, red, yellow and white.

Plants, 25 cts. each, \$2.50 per doz., f.o.b. Nursery
